

Hi Ryan,

KC, Keith and I completed our discussion regarding BCI filters used for quarterly BCI exports to import into Salesforce for Build Central Opportunities. For future exports:

Please include the “Medical Office” Facility Type for both Set #1 and Set #2 exports.

Please include a file/tab with the full list of exported “Medical Office” ONLY Facility Type exports for sales managers to review with the email that usually includes the other exported lines you typically ask to be reviewed for account manager assignment. This list should be for opportunities that have ONLY “Medical Office” as the Facility types. There are other opportunities that have multiple Facility Types, which may include “Medical Office,” but we don’t want those to be included in this file for review.

****See BuildCentral Med Office project review.pdf for full details on review process by Sales Managers****

Quarterly CME Corp will push/update certain Build Central projects into Salesforce as opportunities.

- Including On Hold projects to updated existing project records in SF.

There should be two sets of projects that are pulled from Build Central and uploaded into Salesforce.

Set #1 - \$25M - \$100M projects completing over next two years with this filtering set from Build Central

The close date in SF should equal the earliest possible construction end date in BCD. See below.
Examples, if the construction end date is 9/2023 in BCD the close date should equal 9-1-23 in SF. If the construction end date is Q3/2025 in BCD the close date should equal 6-1-25 in SF.

CME Admin should never remove a BCD opportunity from SF – CME Sales Team is responsible for this.

CME Admin will ask sales managers if they can't figure out which account to assign a new BCD opportunity to. Sales Managers will create a new account if necessary for CME Admin to load this new Opportunity in SF.
